The 11th AOSD INTERNATIONAL CONFERENCE

Steel Drums : A Step Towards Global Sustainability

April 22-24, 2024 | Incheon, Korea

Organized by AOSD (Association of Asia-Oceanic Steel Drum Manufacturers)
Hosted by INSUNG CO.,LTD. (and other Korean steel drum manufacturers)

Welcome Message

On behalf of Korean steel drum manufacturers, it is my greatest pleasure and honor to welcome you all to the 11th Asia-Oceanic Steel Drum International Conference (the 11th AOSD conference), which will be convened in the beautiful city of Incheon, Korea from April 22 to 24, 2024.

Korea, with passionate and motivated steel drum producers, had the pleasure of hosting the 4th AOSD conference in Gyeongju and is once again delighted to be the proud host of the 11th AOSD conference in Incheon.

Under the theme, 'Steel Drums : A Step Towards Global Sustainability' we will gather under one roof to envision tomorrow's steel drum industry, aligning with global environmental protection and corporate social responsibility.

The 11th AOSD conference surely will be an excellent podium where all participants can be enlightened and inspired in every way through in-depth discussions and engaging dialogues among the industry's finest, and where your business network expands within and beyond the conference.

I sincerely hope that our gathering in Incheon for the 11th AOSD conference will illuminate the end of the tunnel of uncertainty stemming from the unprecedented COVID-19 outbreak and provide the best experience for all participants.

I very much look forward to having the pleasure of welcoming you to Incheon next April.

Ki Hyung Ryu

AOSD Vice Chairman
(Chairman of INSUNG CO., LTD.)

PARADISE CITY

Plant Tour

A Plant tour of INSUNG's Dangjin plant will take place on 24 April. (It takes 2hours by bus from Paradise City Hotel.)

INSUNG's Dangjin plant is the sole factory in Korea manufacturing products with capacities ranging from 62 liters to 200 liters in steel drums. The plant efficiently manages production, quality, and equipment maintenance through its Manufacturing Execution System (MES) and contributes to resource recycling by reducing paint and thinner waste to less than 50% through its solvent regeneration system.
